

# 2019 **Cow College**

**FVTC** Regional Center Hwy 22/45 Clintonville, Wisconsin

# **January 8** (1-3 PM)

### The Mammary Gland and the Transition Period

Dr. Laura Hernandez, Dairy Science Department Associate Professor of Lactation Biology, UW-Madison Dr. Hernandez will discuss the structure of the mammary gland and how it gains function over the course of pregnancy and early lactation. She will also examine how the mammary gland regulates maternal metabolism during lactation, and why this is critical particularly during the transition period. This session will also be accompanied by an interactive mammary dissection by Dr. Hernandez.

### January 15 (1-3 PM)

# Impact of Feeding Amino Acids on Health, Performance and Fertility of Dairy Cows

Dr. Phil Cardoso, Dairy Research and Extension Associate Professor, University of Illinois During the transition period from late gestation through early lactation, the dairy cow undergoes tremendous metabolic adaptations. Studies over the last two decades have clearly established the link between nutrition and fertility in ruminants. Dr. Cardoso will focus on the positive effects of amino acids for dairy cows, including milk production.

#### **Improving Dairy Herd Management With Written Protocols**

Amber O'Brien, Calumet County Agriculture Educator, UW-Extension

Learn why all dairy farms need written protocols, what should be included and how to use them effectively. Some examples that will be covered include: emergencies; new employees/temporary help; herd health; milking routine; communication, and more.
